

Female wire processing machine: hydraulic, separate type to bend and cut the copper plate and aluminum plate.

- Available to switch case, distributed electricity-tray; be automatic to control the distributed cable of engineering; use this item easily.
- The opening of copper plate cut by CWC-200V is smooth, which is the excellent item.

Figure for specification

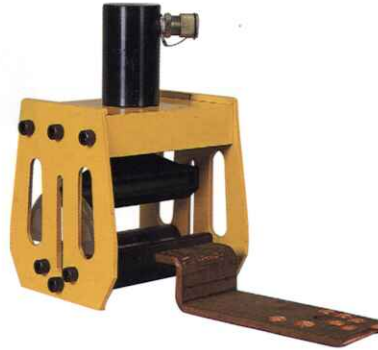

Model	Output	width	Max. Thickness	weight
CWC-150	15 ton	150 mm	10 mm	30 kg
CWC-200	20 ton	200 mm	10 mm	35 kg
CWC-210V	20 ton	200 mm	10 mm	31 kg
CWC-120V	20 ton	120 mm	10 mm	23 kg

- ▶ To bend the copper plate or aluminum plate into 90 degree is correct, won't damage the copper material.
- ▶ CB-150 is open, when bending the long copper plate, N shape or L shape, can take apart the lock pin, then, take the whole copper plate out without any obstacle.
- ▶ There is one design for angle to be ruled 90°, 45° to avoid too much.

CB-150

CB-200A

CB-200B

Hydraulic copper, aluminum plate bending tool

Model	Output	width	Max. Thickness	weight
CB-150	15 ton	150 mm	10 mm	15.5 kg
CB-200A	15 ton	200 mm	10 mm	23.5 kg
CB-200B	15 ton	200 mm	12 mm	38 kg

Available pump : CP-700 or CTE-25AS
